

MODEL QUESTION PAPER- 2024

CLASS- X

ENGLISH (021)

Time : 3 hours

Maximum Marks : 80

- Note: - (i) This question paper is divided into four Sections – A, B, C and D.
(ii) All questions are compulsory. Marks are indicated against each question.

Section – A (Reading)

1. Read the passage given below and answer the questions that follow -

One of the greatest problems facing the world today is the rapidly increasing pressure of population on land and land resources. It is not so much actual pollution of the world but its rate of increase which is important. It works out to be about 1.6 percent per annum, net increase, or about 40 to 55 million additional people every year. As for the birth rate, every second three babies are born somewhere in the world. Why is this enormous increasing in population taking place? It is really due to the speed of knowledge and the practice of death control; death control recognises the work of the doctors and the health services in keeping alive people, who a few years ago, would have died of some serious diseases. Scientists are at work stamping out deadly diseases. Medical care helps people to live longer. We used to think before that 70 was a good age, now 80 or 90 are coming to be recognised as a normal age for human being. People live longer and fewer children are dying, so population of the world is shooting up.

- | | |
|---|---|
| (a) What is the greatest problem the world is facing today? | 1 |
| (b) What does death control recognize? | 2 |
| (c) How is the work of a scientist important? | 1 |
| (d) Find the words from the passage which means – | 2 |
| (i) become greater | |
| (ii) the inhabitants of an area | |

2. Read the passage given below and answer the questions that follow -

Today there is a lot of talk about the environment. All lessons are coming to an agreement to save earth. Like we pollute the earth, we pollute the water. We also pollute the subtle environment through our negative feelings and emotions. We have become a victim of our environment. We are not in control of our mind, we listen a lot about other things in life but we spend very little time to listen about ourselves. How to handle our mind? How to be in the present moment? How to be happy and grateful? We have not learnt this, which is the most unfortunate thing. Then, what is the probable solution? This is where we miss a very fundamental principle that governs our environment, our mind and our life in general.

Our body has the capacity to sustain much longer the vibration of bliss and peace than it does negative emotions because positivity is in the center of our existence. Just like in the structure of atom, protons and neutrons are in the center of the atom and electrons are only in the periphery, same is with our lives, the core of our existence is bliss, positivity and joy but it is surrounded by a cloud of negative ions. Through the help of the breath we can easily get over our negative emotions in a short period of time. Through meditations and certain breathing techniques, we can clear this negative cloud.

Everyone wants to be successful in life, but without knowing what it really means. What are the signs of success? Just having a lot of money, is that success? Why do we think money means success? Because money gives us freedom so that we can do whatever we want. We

may have a big bank balance, but we have stomachache, ulcers, we may have to go for bypass surgery. Can't eat this, can't do that. We spend half of our health to gain wealth and spend half our wealth to again get back the health. Is this the success? It is very bad mathematics and can't rejuvenate the soul.

- (a) How do we pollute our environment? 1
 (b) What is the most unfortunate thing? 2
 (c) What is the centre core of existence? 1
 (d) How can we get rid of our negative emotions? 1
 (e) Choose the correct option and write in your answer book - 1×2=2
